

## Decision Tree for Covid Testing CMHC Team Members

Exposed

## **Fully Vaccinated**

- PCR testing recommended at approx. Day 5
- If negative, may continue to work screening for sx, maintaining universal masking, social distancing, and eating alone (14 days)

Unvaccinated

- PCR testing recommended at approx. Day 5
- Quarantine 10 days-14
  If negative

If positive, removed from work for 10 – 14 days, depending on symptoms and risk

If deemed essential due to staffing challenges, asymptomatic exposed may use binax testing daily, screening for sx, universal masking, social distance, eating alone

- Symptomatic testing is currently being done in the ED decon room 6-8AM, 4:30-6:30 PM daily
- Asymptomatic/Exposed testing is currently being done in the Pre-Procedure Testing Center (PPTC) M-F 8-4:30

Both testing sites require referral by Occupational Health or Infection Prevention
