

You have been sent for testing because you are experiencing potential symptoms of COVID-19 and may be at risk of transmitting this infection to patients and other team members.

- You are asked to receive your swab and immediately leave the building, quarantining until the results of your test is determined.
- If you have pre-registered for *myHealthLink*, your test will be available to you as soon as it is resulted.
- If negative, contact Occupational Health (330-7757/2830 or 577-6494 after hours) and they will determine, with your manager, whether you can continue to work with symptoms, based on their severity.
- If positive, contact Occupational Health or Infection Prevention (795-2892) with the results and they will work with you to establish next steps, including your tentative return to work date.

If you have any questions, please don't hesitate to contact either Occupational Health or Infection Prevention.
